### **KOBELCO SK850LC-10 Delivers Superior Power and Performance for Heavy-Duty Jobs**

*Katy, TX* – KOBELCO Construction Machinery USA is pleased to introduce the enhanced SK850LC-10 excavator. The SK850LC-10 is the largest KOBELCO Generation 10 model and features cutting-edge power and efficiency capabilities to make downtime a thing of the past.

The SK850LC-10 is more durable than ever and able to withstand the rigors of the toughest jobsites. This trendsetting KOBELCO excavator delivers a dynamic bucket digging force of 90,598-lbs to achieve leading-class work volume. Premier working ranges and a powerful 146,800-lb drawbar pull force enable the SK850LC-10 to conquer rough terrain and slopes with increased productivity.

This robust, 185,700-lb unit is powered by a 510-hp Tier IV Final HINO engine, allowing it to tackle heavy-duty applications while remaining highly fuel efficient. While operating in ECO-mode, the SK850LC-10 boasts an impressive ~17% improvement in fuel economy compared to its predecessor. This boost in efficiency is a result of an enhanced hydraulic line layout that further reduces energy loss to ensure outstanding performance. A variable-geometry turbocharger also helps to lower fuel consumption, and a new selective catalytic reduction system decreases NOx emissions by 80% to provide low operation emissions.

Operators can look forward to staying safe and comfortable in the SK850LC-10, regardless of the work at hand. An improved lever control force of 25% further lessens operator fatigue during long hours of operation, while added climate control outlets and an expanded cab interior provide a pleasant work environment. A FOPS top guard, rear-view camera and swing flashers come standard on the SK850LC-10 to enhance jobsite safety.

Maintenance on the SK850LC-10 is simple and cost effective. Easy access to maintenance data from the operation management system greatly improves ease of maintenance scheduling and ensures a long service life, while easy access to the cooling unit, engine compartment and electrical components ensure convenient day-to-day maintenance.

KOBELCO Construction Machinery USA offers industry-leading crawler excavators in the 3,000 lb. to 245,000 lb. classes including zero tail swing, compact, standard, long-reach, mass excavation, and demolition models. Well-known as the excavator authority, KOBELCO is committed to producing quality machines with advanced productivity-boosting features and innovative technologies. With premier capabilities such as no time limit power boost and exclusive independent travel, KOBELCO machines ensure superior performance and efficiency for the toughest worksite challenges.
