SAFETY ON FULL DISPLAY

Standard 3 Sides Safety Camera System

Our high-resolution, large display shows right, left and rear side cameras together. Multiple display allows the operator to customize viewing needs to enhance operator awareness and jobsite safety.

Large 10-Inch Color Monitor

The easy-to-operate menu screen and recognizable icons assist the operator to select the most important information needed to ensure jobsite safety and machine control.

Dial in the Right Information

Simply turn the jog dial to the right or left to select an operational feature, then press the dial to confirm selection.

PREMIER OPERATOR COMFORTS

Heated Air Ride Suspension Seat

A 7-way adjustable seat achieves excellent shock absorption and superior ride comfort.

Multi Vent Air Conditioner

Cool air is blown from multiple outlets toward the operator's body for more comfortable operation.

Ergonomic Lever Angles

Operators can move levers horizontally without twisting their wrists, reducing fatigue.

Adjustable Height Joysticks

Joystick height is manually adjustable to suit operator's preference.

LED Interior Light

Interior lights turn on and off automatically when the door is open or the ignition is turned to the OFF position.

This ensures safe entry and exit in the dark.

Tilting Left Side Console

Flip-up left console with integrated pilot control lock lever tilts for easy entry and exit from the cab.

GREATER MULTI-FUNCTION CAPABILITIES

Attachment Mode Selection

The auxiliary flow rates for the bucket, breaker, nibbler and thumb are all now adjustable by the operator through the monitor, allowing you to change tools quickly and easily. Mode settings for other attachments like the tilt rotator can be added or changed.

Engine Maintenance Lower service platform makes engine service easier.

Two-Stage Air Filter

DEF Tank The DEF fill is located inside the locking tool box.

Left Side (Radiator and Cooling System Elements) Laid out for easy access to radiator Hydraulic pump and engine filter and cooling system with clean

out screen.

Right Side (Ground Level Maintenance)

Fuel Filter / Pre-Filter with Integrated Water Separator

Engine Oil Filter

DURABILITY YOU CAN TRUST

Heavier Door Panels and Supports for Added Body Rigidity

Newly designed and reinforced rear right and left doors provide added protection for the radiator and pump compartments.

Angled upper deck guards run along the side of the upper

Angled Upper Deck Guards

Total Support for Machines with Network Speed and Accuracy

KOMEXS is a telematics system for receiving machine information. Manage your machines anywhere in the world using the Internet. Location, workload and diagnostic data aid business operations.

Direct Access to Operational Status

Location Data

Accurate location data can be obtained even from sites where communications are difficult.

Fuel Consumption Data

Data on fuel consumption and idling times can be used to indicate improvements in fuel

Operating Hours

A comparison of operating times of machines at multiple locations shows which locations are busier and more profitable. Operating hours on site can be accurately recorded, for running time calculations needed for rental machines, etc.

Graph of Work Content

The graph shows how working hours are divided among different operating categories, including digging, idling, traveling, and optional operations

Maintenance Data and Warning Alerts

Machine Maintenance Data

Provides maintenance status of separate machines operating at multiple sites. Maintenance data is also relayed to KOBELCO service personnel, for more efficient planning of periodic servicing.

Security System

Engine Start Alarm

Sends a notification if the engine is started outside of pre-defined hours.

Area Alarm

Sends a notification if the machine leaves a pre-defined area.

SAFETY AND CONVENIENCE IN EVERY CORNER

Standard Rear, Left and Right Side Cameras

Swing Flashers for a Safer

Standard swing flashers notify ground workers that the machine is swinging.

Travel Alarm

Seatbelt Unfastened **Indicator on Monitor**

Standard 7 LED Lights Bright LED lights ensure visibility even during night work.

Wire Mesh or Vertical Bar Front Cab Guard (optional)

Battery Disconnect Switch with DEF Purge Notification

Machine Guidance Ready Brackets* Pre-welded brackets for quicker and easier installation of Machine Guidance Systems.

Quick Coupler Piping Brackets*

Adjustable Height Joystick Consoles

The operator can adjust height of attachment control levers.

Hands-Free Bluetooth® **Phone Calls**

USB Charging Port / 12V Power Outlet

Smartphone Holder Includes USB port for charging.

HIGH & WIDE

The High & Wide Specification is specially equipped for forestry and hilly terrain work.

The High & Wide Specification has the generous ground clearance needed to penetrate sites littered with stumps or rocks.

The extra crawler width ensures excellent stability, contributing to uninterrupted working and greater lifting capacity.

Durability is significantly improved with full track guides and larger upper rollers for the crawlers, to prevent de-tracking. With double grouser shoes used for better grip, these machines are designed to work smoothly over the roughest ground.

Performance

Excellent Stability

Overall width of crawlers is greater than standard models, for dependable stability and improved lifting capacity.

Overall width of crawlers 10'11" (3,340 mm)

Generous ground clearance

Increased ground clearance over standard models for navigating rocky, forestry and swampy terrain.

Ground clearance 30.5" (775 mm)

Durability

Unbeatable durability

The crawlers are designed to provide unbeatable durability to take on the harshest terrain. They feature full track guides to eliminate de-tracking concerns, a reinforced guide frame built to withstand heavy impact, and large, double-support, outer flanged upper rollers unfazed by powerful vibrations.

- Note:

 1. Do not attempt to lift or hold any load that is greater than these lift capacities at their specified lift point radius and heights. Weight of all accessories must be deducted from the above lift capacities.

 2. Lift capacities are based on machine standing on level, firm, and uniform ground. User must make allowance for job conditions such as soft or uneven ground, out of level conditions, side loads, sudden stopping of loads, hazardous conditions, experience of personnel, etc.

 3. Bucket pin attachment point defined as lift point.

 4. The above lift capacities are in compliance with ISO 10567. They do not exceed 87% of hydraulic lift capacity or 75% of tipping load. Lift capacities marked with an asterisk(*) are limited by hydraulic capacity rather than tipping load.

- 5. Operator should be fully acquainted with the Operator's and Maintenance Instructions before operating this machine. Rules for safe operation of equipment should be adhered to at all times.
 6. Lift capacities apply to only machine as originally manufactured and normally equipped by KOBELCO CONSTRUCTION MACHINERY CO., LTD.
